

The Bird Sanctuary - Species list

The following tables list the species that have been recorded in the Sanctuary since 2004. Four additional entries from Gigi Crompton's Cambridgeshire flora have been added; the year of recording is given for these. Some sections give the most recent year of sighting, others (particularly flora, fungi and insects) are cumulative. For the flora a number in the box indicates the date of flowering. Those species recorded as being present are indicated as follows: L = leaf, F = flower, S = seed, X = sighting (or heard or signs or otherwise present), C = caterpillar, D = dead. Some species may be mis-identified. If you note any other species, please add to the list. The list for the grid tetrad TL45j, in which the Sanctuary lies, based on surveys in the area by the Cambridge Natural History Society during 2003 and 2004, is available on the web at <http://www.cnhs.org.uk>. Jonathan Shanklin (j.shanklin@bas.ac.uk).
